

Homework 1

Homework is submitted by sending an email to j.hansen@uni-koeln.de on April 28th at 23:59 the latest and either (i) attaching a zipped folder containing the apps to the email or (ii) sharing a URL pointing to the apps (e.g. a github repository). Remember to add your examination/matriculation number and full name to the email.

Assignment 1 **my_first_crt** (cont'd) [2 points]

In the Cognitive Reflection Test app we have written in class, add a table to the `Result.html` page that has the following columns: `crt_question`, player's answer, correct answer, and a boolean column that gives "True" if the answer to a question was correct and "False" otherwise. It should look approximately as follows:

crt_question	player's answer	correct answer	correct/incorrect
crt_q1			
crt_q2			
crt_q3			

.....

Assignment 2 **my_motivation_survey** [3 points]

Attempt to replicate the "Motivation Survey" which can be found on the link below. You should access and play a demo of the survey to see what it looks like.

Furthermore, add a table to the `Result.html` page that has the following columns: `_question`, `you`, `others`, and a difference column that gives the difference between the `you` and `others` column. It should look approximately as follows:

question	you	others	difference
Social impact			
Money and prestige			
.			
.			
.			

.....

Assignment 3 `my_reciprocity_survey` [3 points]

Attempt to replicate the “Reciprocity Survey” which can be found on the link below. You should access and play a demo of the survey to see what it looks like.
